

A300 DL

The mixer **A300 DL** is equipped with one arm with T-shaped paddles easily removable that ensures a comfortable and perfect cleaning. The **A300 DL** standard model is equipped with 1 mixing speed and two turning senses, although optionally the machine can be supplied with adjustable Variable Speed by means of a digital potentiometer which ensures an ideal mixing for different types of product.

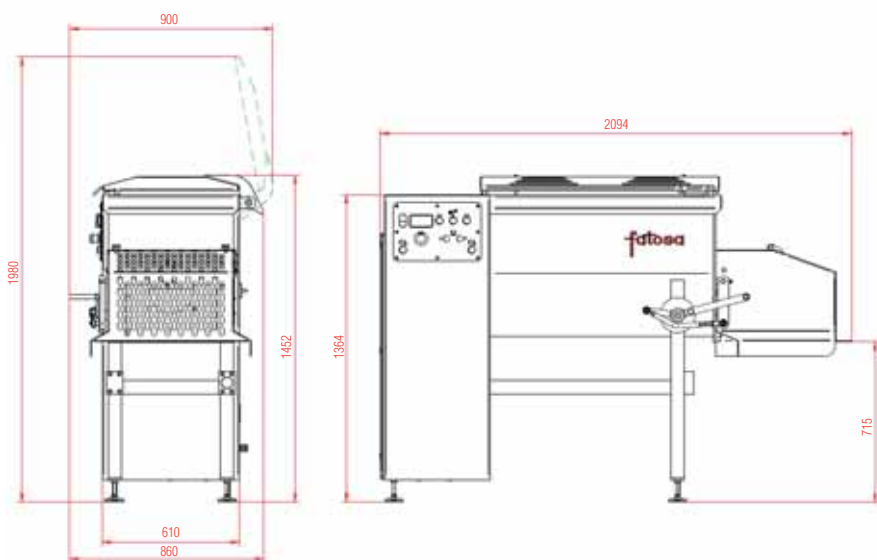

The machine is equipped with a digital timer in which the total mixing time and partial times of each sense of rotation can be selected.

The unloading is done by means of push-buttons through a manual opening flap. The unloading area is designed for the positioning of a 200 litres bin at the exit of the product and strictly complies with all current safety regulations.

The **A300 DL** mixers can be equipped with a column lifter for 200 litres bins fixed to the machine and fitted with a tray to prevent the product from falling during loading.
